The **INTERNATIONAL EQUITY FUND** ✓ is invested primarily in mutual funds which invest in companies headquartered in countries outside the United States. Of all common stock available for investment in the world today, roughly 2/3 are in this category. Since some of the economies of the world are growing more rapidly than the U.S., significant investment returns have been achieved by international investors over the past ten to fifteen years. On the other hand, since not all foreign stock markets are as developed and mature as the U.S. market, they can be extremely volatile with potential for negative yearly returns.

**Sample Holdings:** Arch Capital Group Ltd, Baidu Inc, Compass Group PLC, Covidien PLC, Mitsubishi Electric, Novartis AG, Reed Elsevier PLC, Royal Dutch Shell, Shire PLC, TE Connectivity Ltd, Total SA, WPP PLC

The **AGGRESSIVE EQUITY FUND** ✓ invests primarily in the common stock of small and medium sized companies (“SMID”). These companies are growing rapidly in their sales and profits (earnings) or are undervalued. A company is undervalued when (in the opinion of the investment manager) the stock price is lower than the value of the company. The performance history of SMID companies has been volatile. The history includes extended periods of negative returns and shorter periods with returns higher than the overall stock market. Over long periods, though, SMID company portfolios have produced the greatest returns, but they also have the greatest potential for short term losses.

The **GROWTH AND VALUE EQUITY FUND** ✓ is currently invested in mutual funds and separate accounts which invest primarily in larger U.S. companies similar to the S&P 500. The stocks are actively monitored to include rapidly growing companies (growth stocks) or companies with a stock price which (in the opinion of the investment manager) does not fairly reflect the value of the company (value stocks). Since the Growth and Value Equity Fund is invested primarily in common stock, there can be considerable volatility, with potential for negative yearly returns.

**Fund Managers**
- Artisan International Value (APHKX)
- SSgA Global Equity Ex US

**OkMRF Fund Risk Level**
- Conservative
- Moderate
- Aggressive

Participants should have a minimum investment time horizon of 7 years, with 10 years being preferable.
The **S&P INDEX FUND** seeks investment results that correspond to the aggregate price and dividend performance of securities in the Standard & Poor's 500 composite Stock Price Index (S&P 500 Index). The Fund invests primarily in large U.S. companies found in the S&P 500 Index. The Fund also may invest in stock index futures and other equity derivatives. The Fund attempts to achieve a 95% correlation to the S&P 500 Index without taking into account the Fund’s expenses.

---

The **BALANCED FUND** is a diversified group of investments. The fund is designed for participants who seek exposure to several asset classes, such as stocks and bonds. The objective of the fund is to preserve capital and achieve a positive return at the same time. The diversified assets include fixed income investments, common stocks and cash equivalents. The fixed income investment provides a predictable flow of income to the fund. The stock investments are designed to participate in the long term growth of the economy. The stock portion of the account is expected to produce the best returns to the account in the long run but may also produce some volatility to the fund.

**Sample Holdings:** Apple Inc, Exxon Mobil Corp, AT&T Inc, General Electric, GlaxoSmithKline, Johnson & Johnson, Microsoft, Pfizer, Coca Cola Co Inc, Nestle, Toyota Motor, Shell Transport and Trading

**Target Asset Allocation:**
- US Stocks: 45%
- International Stocks: 20%
- Fixed Income: 35%

- Aggressive: 5

Participants should have a minimum investment time horizon of 7 years, with 10 years being preferable.
The **TOTAL YIELD BOND FUND** primarily invests in investment grade debt securities issued by the US Government, US Agencies, and US Corporations. The fund will also opportunistically invest in municipal bonds, high yield bonds, emerging market bonds and bonds issued by foreign governments. The goal of the fund is to give the manager the ability to invest in the best bond opportunities around the world while still maintaining a diversified investment grade portfolio. There are significant risks associated with investing in these types of bonds with the potential for negative returns.

**Fund Characteristics:** Average Coupon: 3.93%, Duration: 4.19, Yield-to-Maturity: 3.13%, Average Quality Rating: A.

The **BOND INDEX FUND** is comprised of fixed income securities which replicate the Barclays Capital Aggregate Bond Index. The purpose of this fund is to generally mirror the performance the Barclays Capital Aggregate Bond Index with minimal tracking error. A stratified sampling approach is used to create a representative portfolio of securities from each industry, quality and duration sector of the Index. Each sector is held in proportion to its representative weight in the index as the fund attempts to achieve a 99% correlation to the Barclays Capital Aggregate Index.

**Fund Characteristics:** Average Coupon: 3.31%, Duration: 5.43, Yield-to-Maturity: 2.05%, Average Quality Rating: AAA.

The **INVESTMENT CONTRACT FUND** provides the opportunity to protect the principal value (capital) of an account. This fund invests mainly in a diversified portfolio of investment contracts typically offered by insurance companies. These investments are currently subject to little or no fluctuation in principal value, however the interest rate received will fluctuate over time. The credit risk for this fund is based on the quality and credit worthiness of the insurance company which is promising to pay on the contract. This risk is minimized by diversifying the investment over many issuers.

**Sample Contract Holdings:** Monumental, Metropolitan Life, Aviva Life and Annuity Co., Prudential Insurance Co., ING Life & Annuity, MassMutual, New York Life, Pacific Life Ins, State Street Bank

**Fund Managers**
- JP Morgan Core Bond Trust
- Pioneer Opportunistic Core Plus Bond Fund

**OkMRF Fund Risk Level**

- Mellon Stable Value Fund

**OkMRF Fund Risk Level**
- **Conservative**
- **Moderate**
- **Aggressive**

Participants should have an investment time horizon of less than 3 years.
The **Money Market Fund** seeks current income with liquidity and stability of principal. The Fund invests in high-quality short-term securities issued or guaranteed by the U.S. government or by U.S. government agencies and instrumentalities as well as high-quality short-term securities issued by US corporations. Some of the securities purchased by the Fund may be subject to repurchase agreements. The Fund returns fluctuate with the overnight Fed Funds rate. The Fund complies with SEC rules applicable to all money market funds.

**Fund Characteristics:** Weighted Average Maturity: 42 Days, Weighted Average Life: 60 Days, Average Rating AAA

---

The **Growth Fund** seeks to provide capital appreciation and some current income and invests in a combination of mutual funds according to a fixed formula that over time should reflect an allocation of approximately 80% in common stocks and 20% in bonds. The percentages of the fund’s assets allocated to each of the underlying funds are:

**Allocation of Underlying Vanguard Funds:**
- Total Stock Market Index Fund: 55.8%
- Total International Stock Index Fund: 24.1%
- Total Bond Market II Index Fund: 16.1%
- Total International Bond Index Fund: 4.0%

**Fund Managers**
- Goldman Sachs Financial Square Prime MM (FPOXX)

**OkMRF Fund Risk Level**
- Conservative (1) Moderate (2) Aggressive (5)

Participants should have an investment time horizon of less than 3 years.

---

The **Moderate Growth Fund** seeks to provide capital appreciation and a low to moderate level of current income and invests in a combination of mutual funds according to a fixed formula that over time should reflect an allocation of approximately 60% in common stocks and 40% in bonds. The percentages of the fund’s assets allocated to each of the underlying funds are:

**Allocation of Underlying Vanguard Funds:**
- Total Stock Market Index Fund: 41.8%
- Total International Stock Index Fund: 18.0%
- Total Bond Market II Index Fund: 32.2%
- Total International Bond Index Fund: 8.0%

**Fund Managers**
- Vanguard LifeStrategy Moderate Growth Fund (VSMGX)

**OkMRF Fund Risk Level**
- Conservative (1) Moderate (2) Aggressive (5)

Participants should expect volatility and have a minimum investment time horizon of 7 years with 10 years being preferable.
The **Conservative Growth Fund** seeks to provide current income and low to moderate capital appreciation and invests in a combination of mutual funds according to a fixed formula that over time should reflect an allocation of approximately 40% in common stocks and 60% in bonds. The percentages of the fund’s assets allocated to each of the underlying funds are:

**Allocation of Underlying Vanguard Funds:**
- Total Stock Market Index Fund: 27.9%
- Total International Stock Index Fund: 12.0%
- Total Bond Market II Index Fund: 48.1%
- Total International Bond Index Fund: 12.0%

The **Income Fund** seeks to provide current income and some capital appreciation and invests in a combination of mutual funds according to a fixed formula that over time should reflect an allocation of approximately 80% in common stocks and 20% in bonds. The percentages of the fund’s assets allocated to each of the underlying funds are:

**Allocation of Underlying Vanguard Funds:**
- Total Stock Market Index Fund: 13.9%
- Total International Stock Index Fund: 6.0%
- Total Bond Market II Index Fund: 64.1%
- Total International Bond Index Fund: 16.0%

The **Auto Change Option** assists participants by simplifying investment choices. Instead of the participant choosing between stocks, bonds, and risk levels, he/she can simply request their account to be invested in an “age appropriate” manner. With this option, a participant’s account will be invested in a pre-blended fund which will change over time as they age without making any additional investment decisions. The investments used are:

- Growth Fund
- Moderate Growth Fund
- Conservative Growth Fund
- Income Fund
