TRUST DESCRIPTION

The Diversified Real Asset Collective Trust (the "Trust") is an actively managed portfolio designed to provide strategic exposure to three core real assets: Treasury Inflation-Protected Securities ("TIPS"), commodities, and real estate. The Trust seeks to achieve its objective by investing under normal circumstances substantially all of its assets in units of the PIMCO Real Return Collective Trust, the PIMCO CommoditiesPLUS® Collective Trust, and the PIMCO RealEstatePLUS Collective Trust (the "Underlying Trusts"). The Trust has an equal-weighted benchmark of 1/3rd Barclays U.S. TIPS Index, 1/3rd Bloomberg Commodity indexSM, and 1/3rd Dow Jones U.S. REIT Index. The Trust and Underlying Trusts are not mutual funds. SEI Trust Company serves as the trustee of the Trust and maintains ultimate fiduciary authority over the management of, and investments made in, the Trust. The trustee has engaged PIMCO to act as investment adviser to the Trust. The Trust is part of a collective investment trust that is exempt from registration under the Investment Company Act of 1940.

INVESTOR BENEFITS

This Trust offers investors "3-in-1" exposure to three core real assets represented by Underlying Trusts, actively manages each, and actively manages the mix, seeking to provide real return potential for investors. The active management and asset allocation decisions are driven by PIMCO's "top down" and "bottom up" investment process.

Potential benefits of this Trust include:

- Inflation Hedging Strategies: TIPS, commodities, and real estate have returns that are either contractually or economically related to inflation and therefore may be used to potentially hedge future inflation risk
- Diversification: Real assets returns respond differently to changing macroeconomic factors and micro factors than do core stocks and bonds and therefore may provide portfolio diversification
- Actively Managed Exposures: The underlying TIPS, commodities, and real estate portfolios of the Underlying Trusts, as well as the mix between them, are each actively managed in an effort to provide returns relative to each asset class's respective benchmark

THE TRUST ADVANTAGE

The Trust combines the strategic investment opportunities of real assets with the investment management expertise of PIMCO. As a pioneer in fixed income, real return, and asset allocation, PIMCO is positioned to help integrate these core competencies in the context of the Diversified Real Asset strategy. Fixed income and real return expertise are essential to obtaining exposure to the real asset classes within the Trust and actively managing them in an effort to enhance return potential.

VALUE OF INFLATION PROTECTION STRATEGIES

An allocation to PIMCO inflation-protection strategies may be beneficial as part of a diversified portfolio. Real assets, which include inflation-linked bonds, commodities, and real estate, tend to exhibit a positive correlation to inflation. By contrast, traditional assets such as stocks and bonds have historically underperformed when inflation has surprised to the upside. The benefit of this positive correlation to inflation is that real assets can potentially improve portfolio diversification, help hedge inflation risk, and help enhance and preserve the future purchasing power of investments.

ABOUT SEI

SEI Trust Company is a trust company organized under the laws of the Commonwealth of Pennsylvania. SEI Trust Company is a wholly owned subsidiary of SEI Investments Company. SEI (NASDAQ:SEIC) is a leading global provider of asset management services and investment technology solutions.

ABOUT PIMCO

PIMCO, founded in 1971, is a global investment solutions provider managing retirement and other assets for more than 8 million people in the U.S. and millions more around the world. Our clients include state, local, and union pension and retirement plans whose beneficiaries come from all walks of life, including educators, healthcare workers, and public safety employees. We also serve individual investors, working in partnership with financial intermediaries such as Registered Investment Advisors, broker/dealers, trust banks, and insurance companies. We are advisors and asset managers to central banks, corporations, universities, foundations, and endowments. PIMCO has offices in North America, Europe, Asia, and Australia, and is owned by Allianz Global Investors, a subsidiary of the Munich-based Allianz Group, a leading global insurance company.

ABOUT THE BENCHMARKS

40% Barclays U.S. TIPS Index, 25% Bloomberg Commodity IndexSM, 35% Dow Jones U.S. Real Estate Investment Trust Index. The Barclays U.S. TIPS Index is an unmanaged market index comprised of all U.S. Treasury Inflation Protected Securities rated investment grade (Baa3 or better), have at least one year to final maturity, and at least \$250 million par amount outstanding. Performance data for this index prior to 10/97 represents returns of the Barclays Inflation Notes Index. The Bloomberg Commodity Index Total Return is an unmanaged index composed of futures contracts on 20 physical commodities. The index is designed to be a highly liquid and diversified benchmark for commodities as an asset class. The DJ U.S. Select Real Estate Investment Trust (REIT) Index is an unmanaged index comprised of U.S. publicly traded Real Estate Investment Trusts. Prior to April 1st, 2009, this index was named the Dow Jones Wilshire REIT Index. It is not possible to invest directly in an unmanaged index. Prior to August 1, 2016, benchmark performance reflects the following index composition: 1/3 each- Barclays U.S. TIPS Index, Bloomberg Commodity Index SM, Dow Jones U.S. Real Estate Investment Trust Index. Investment objectives, risks, charges, fees and expenses, and other important information about the Trust are contained in the Trust's Disclosure Memorandum.

The PIMCO Diversified Real Asset Collective Trust is a series of PIMCO Collective Investment Trust. The PIMCO Diversified Real Asset Collective Trust is a trust for the collective investment of assets of participating tax qualified pension and profit sharing plans and related trusts, and governmental plans as more fully described in the Declaration of Trust. The terms of the plan and Declaration of Trust are incorporated by reference and should be reviewed for a complete statement of its terms and provisions. The PIMCO Diversified Real Asset Collective Trust is managed by SEI Trust Company, the trustee, based on the investment advice of PIMCO, the investment adviser to the trust. SEI Trust Company has claimed an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act and, therefore, is not subject to registration or regulation as a pool operator under the Act. As a bank collective trust, PIMCO Diversified Real Asset Collective Trust is exempt from registration as an investment company.

Past performance is not a guarantee or a reliable indicator of future results. A word about risk: The Trust's investment performance depends on how its assets are allocated and reallocated between the Underlying Trusts according to the Trust's asset allocation target and range. Because the Trust invests all of its assets in Underlying Trusts, the risks associated with investing in the Trust are closely related to the risks associated with the securities and other investments held by the Underlying Trusts. Investing in the bond market is subject to certain risks including market, interest-rate, issuer, credit, and inflation risk; investments may be worth more or less than the original cost when redeemed. Inflation-linked bonds (ILBs) issued by a government are fixed-income securities whose principal value is periodically adjusted according to the rate of inflation; ILBs decline in value when real interest rates rise. REITs are subject to risk, such as poor performance by the manager, adverse changes to tax laws, or failure to qualify for tax-free pass-through of income. Commodities contain heightened risk including market, political, regulatory, and natural conditions, and may not be suitable for all investors. Derivatives and commodity-linked derivatives may involve certain costs and risks such as liquidity, interest rate, market, credit, management, and the risk that a position could not be closed when most advantageous. Commodity-linked derivative instruments may involve additional costs and risks such as changes in commodity index volatility or factors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political, and regulatory developments. Investing in derivatives could lose more than the amount invested. Diversification does not ensure against loss.

Effective duration is the duration for a bond with an embedded option when the value is calculated to include the expected change in cash flow caused by the option as interest rates change.
